IN GENERAL PRACTICE/FAMILY MEDICINE
NEW OPPORTUNITIES FOR LEARNING

April, May and June 2008

Letter from the Congress Vice-Chairman

Dear colleagues:

It is with enormous pleasure that I invite you to participate in the first virtual congress of General and Family Medicine, organized by the Portuguese Association of GP's Virtual GP/Family Medicine working Group. This invitation has a special meaning, since it was carried out on the first day of Wonca Europe 2007, an event of great importance in the exchange of experiences between specialists of General Practice/Family Medicine from around the World.

Coming from a Portuguese doctors' organization (demonstrating its great vitality), this first virtual congress of the specialty is destined to all those who want to meet us through the resources that nowadays allow the globalization of the exchange of ideas and knowledge.

An event with this design does not substitute the classical physical presence meetings, but aims to promote a complementary alternative. Pay attention to our website. Given the initiative's design, mobilizing a large-scale informatic interface, it will have a significant turnover and updating.

We look forward to be with you, in April, May and June of 2008 "in a computer near you"!

Fernando Santos
Congress Vice-Chairman
